**Re: Request to Sign-On to Congressional Letter to CMS on Patient Access to Durable Medical Equipment and Related Services**

Dear Member of Congress:

The undersigned members of the Independence Through Enhancement of Medicare and Medicaid (ITEM) Coalition strongly urge you to sign-on to and support the attached Congressional letter urging the Centers for Medicare and Medicaid Services (CMS) to use its administrative authority to make important, needed reforms to current durable medical equipment (DME) policies and regulations. The attached bipartisan letter was recently distributed by Reps. Cathy McMorris Rodgers (R-WA), Dave Loebsack (D-IA), Lee Zeldin (R-NY), and Diana DeGette (D-CO). The letter highlights several areas within current DME policy that negatively affect Medicare beneficiary access to care, and provides suggestions for how the Secretary can and should act to make improvements that Medicare beneficiaries desperately need.

Over the past several years, CMS has made significant policy and regulatory changes to the Medicare DME benefit. Many of these changes have been intended to save taxpayer money; however, they have had a substantial negative impact on beneficiary access to vital devices and services that improve health and function. As the Congressional sign-on letter details, CMS's decisions involving the competitive bidding program, non-competitive bid areas (CBAs), complex rehabilitation technology (CRT) accessories, and oxygen concentrators have resulted in deep cuts that ultimately harm beneficiary access to care.

The Administration has the authority to rectify the procedural and substantive issues in DME policy in each of these areas, and the letter calls for CMS to take action to provide needed relief for providers and suppliers of DME and the beneficiaries who depend on these services and devices.

The ITEM Coalition has commented on many of these issues in the past, and supports and applauds the bipartisan Congressional letter on these issues to CMS. The undersigned organizations hope you will join your colleagues in supporting these needed changes to improve Medicare beneficiary access to care.
