**Re: Please Cosponsor Legislation to Restore Access to Manual CRT Wheelchair Accessories**

Dear Representative:

The undersigned members of the Independence Through Enhancement of Medicare and Medicaid (ITEM) Coalition Steering Committee **respectfully request that you cosponsor H.R. 3730**. This bipartisan legislation from Representatives Lee Zeldin (R-NY) and John Larson (D-CT) permanently exempts manual Complex Rehab Technology (CRT) wheelchair accessories and components for people with disabilities and chronic conditions from Medicare's Competitive Bid Program (CBP). This important legislation will protect Medicare beneficiary access to manual complex rehab technology, as well as essential components known as wheelchair "accessories."

Earlier this year, you cosponsored similar legislation, H.R. 1361, that would permanently exempt *power* and manual CRT wheelchair accessories and components from the Medicare CBP. Since that time, the Administration exempted *power* CRT wheelchair accessories and components from Medicare's CBP. On June 23, 2017, the Centers for Medicare and Medicaid Services (CMS) [announced](#) it will not be applying Medicare CBP reimbursement levels to CRT Group 3 power wheelchair accessories. This policy change averts significant cuts that were scheduled to go into effect July 1, 2017 and avoids drastic reductions in access to this specialized mobility technology for Medicare beneficiaries with significant disabilities. The ITEM Coalition is grateful to CMS and the Members of Congress that supported this important action.

Unfortunately, CMS did not extend the new rule to CRT *manual* wheelchairs, making a legislative fix necessary to preserve Medicare beneficiary access to CRT accessories and components in manual wheelchairs. Now, we are asking that you cosponsor H.R. 3730, the important final iteration of the effort begun by H.R. 1361.

Congressional action is urgently needed to permanently help Medicare beneficiaries who are manual CRT wheelchair users obtain the accessories and components they need. The Administration's decision in June has left our members with no choice but to turn to legislative solutions to this perennial problem. We believe strong Congressional support for this important fix is needed, and we are asking Members of Congress to cosponsor this legislation to ensure that Medicare beneficiaries who are manual CRT wheelchair users can obtain the accessories and components they need.

As you know, power and manual CRT wheelchairs and CRT accessories or components are essential for a small segment of wheelchair users, about 10 percent of the Medicare population, with significant disabilities such as ALS, cerebral palsy, multiple sclerosis, muscular dystrophy, spinal cord injury and traumatic brain injury. For these wheelchair users, a wheelchair is not complete, usable or safe without the appropriate complex rehab technology components included.

Many members of Congress, including you, supported H.R. 1361 earlier this year, which would have corrected this problem for CRT accessories and components in power and manual wheelchairs. H.R. 3730, the latest legislation from Representatives Zeldin and Larson, effectively replaces H.R. 1361, as CMS has already exempted CRT accessories used with power wheelchairs from Competitive Bid pricing. The bill will help ensure parity in access to power and manual CRT mobility technology.

We are writing to express our strong support for H.R. 3730 and to emphasize the importance of protecting patient access not just to accessories used with complex rehab *power* wheelchairs, but also to those used on complex rehab *manual* wheelchairs.

Regardless of injury, illness, disability, or chronic condition, all Medicare beneficiaries should be eligible for the same access to medically necessary mobility devices, services, and accessories. Anything less can have serious consequences for beneficiaries. **We urge you to cosponsor H.R. 3730 to ensure that components and accessories used with CRT manual wheelchairs are protected.**

To sign on as a cosponsor of H.R. 3730, please contact Matt Scott (Matthew.Scott@mail.house.gov) in Representative Zeldin's office or Sylvia Lee (Sylvia.Lee@mail.house.gov) in Representative Larson's office.

\* \* \*

The ITEM Coalition is a national consumer and clinician-led coalition advocating for access to and coverage of assistive devices, technologies, and related services for persons with injuries, illnesses, disabilities, and chronic conditions of all ages. Our members represent individuals with a wide range of disabling conditions, as well as the providers who serve them, including such conditions as multiple sclerosis, spinal cord injuries, brain injuries, stroke, paralysis, limb loss, cerebral palsy, hearing and speech impairments, visual impairments, vision loss, spina bifida, myositis, and other life-altering conditions.

We would be happy to meet to discuss this issue further and are available for any questions you may have. To contact the ITEM Coalition, please contact the ITEM Coalition coordinators, Peter Thomas, at [Peter.Thomas@powerslaw.com](mailto:Peter.Thomas@powerslaw.com) or Leif Brierley at [Leif.Brierley@powerslaw.com](mailto:Leif.Brierley@powerslaw.com), or by calling 202-466-6550.

Sincerely,

**ITEM Coalition Steering Committee Members**
